Inspiration

UPHOLSTERY

All upholstery in our range is hand-made using solid, beech wood frames. Different quality foam, fabrics or leather may be used, as well as different paints or lacquers for the legs. Regardless of the chosen material or finish, damages can happen if treated carelessly and caution must be taken regarding grime, grease and liquids.

Please follow below care instructions to enjoy your upholstery to the fullest:

Flip, rotate and fluff removable cushions regularly to ensure even wear and increase longevity.

Tight, attached seat and back cushions will stretch and wrinkle with use. You can easily restore their appearance by smoothing the surface and tucking excess upholstery into the sides of the seat or back. To minimize fading, we recommend placing the upholstered pieces where they won't be exposed to direct sunlight.

If moving you're furniture, lift sofas or chairs by their bases to protect the frames. Do not drag or pull by the arms;

Because dust and dirt cause upholstery to wear faster, we recommend vacuuming regularly with an upholstery attachment. Also vacuum before cleaning in any form.

For spot cleaning, use a cleaning product that corresponds with your fabric or leather. Test any cleaner in an inconspicuous area first. Never use spot cleaners containing bleach or alcohol.

You'll get the best results if you treat stains immediately. Blot up as much of the spill as possible with a clean, dry, white cloth. Don't rub.

For persistent stains and overall cleaning, contact a professional upholstery cleaning company.

An annual professional cleaning will keep your upholstery looking its best.

The photographs in the catalogue do not always faithfully reproduce the colours.

The dimensions in our catalogue are in CM and measured from the widest outside points, and may vary slightly. When exact dimensions are needed, please advise us when placing the order.

We reserve the right to make any change in design or finishes without prior notice.

TABLES

The table tops are made of solid, oak and beech wood. Natural variations occurring in the wood are not considered defects and the colour-fastness or matching of colours, grains, or textures of such materials may be different from a product to the other. The tops might contain small knots and cracks, which gives the table a sturdy, robust look. The furniture made of solid wood is sensitive to the environment. However, quality problems may be reduced by installing, using or maintaining the furniture in accordance with the instructions below:

- Do not place the furniture outdoors;
- Do not place furniture next to radiators, heating and cooling vents. Never expose the furniture to direct fires (fireplaces, stoves, etc.) or other intense sources of heating. Recommended climate: temperature of 18-22 Celsius degrees, humidity between 40 to 60%.
- Cyclic changes in temperature in an unheated environment (cool at night, warmer during the day) can cause small cracks of the wood;
- Avoid direct sunlight, as this can cause cracking and deterioration of the colour;
- Do not put hot, scratchy or wet objects on finished surface; use tablecloth/ place mats;
- The oil we are using is normally meant for flooring, which makes it very resistant. Still, if small repairs/ touch-ups should be made, please contact a Rubio Monocoat dealer in your vicinity.
